Lyme Disease Breakthrough Totally New Protocol Shows Remarkable Effects

For several months we have had patients on a new protocol for Lyme Disease—and it is working! This is one case history: a 40 year old male Lyme patient was diagnosed 2 years ago with ALS. He had the ***highest borrellia*** ever measured on a flow cytometry test. He had been wheelchair-bound for 18 months and then bedridden because he was unable to walk. He had lost his ability to speak intelligibly and had only a short time to live.

We tested his markers using [Flow Cytometry](#) and then started his regimen of **Germ Slayer** at 2 oz 4 times per day for 8 weeks. At the end of that period, he had the ***"best improvement of any protocol tested by Flow Cytometry"***. At two months, he was able to stand unassisted and walk 18 steps. It had been 15 months since he was able to have mobility! There were also dramatic improvements in OT, PT, and speech therapy.

Germ Slayer is a breakthrough in production technology of nano-particle size silver that stays in a fluid state within the body for up to four hours. There are no side effects except during the initial start up as **Germ Slayer** attacks existing virus and bacteria. The Herxheimer reaction may be severe, but minimized by titrating dosage to symptoms for 1-2 weeks. **Germ Slayer** has no contra-indications and can be used in conjunction with traditional antibiotic treatments and other medications.

There is ***no known medical downside*** risk to this protocol. There are thousands of patients using **Germ Slayer** and now more than 50 Lyme patients experiencing significant clinical symptom improvement.

Would you like to partner with us in beginning a new non-pharmaceutical treatment alternative for Lyme patients, we would. We request that you refer us to Lyme patients who want to get off antibiotics and improve their quality of life. For more information on treatment protocol, medical implications and results to date, please contact via e-mail our Medical Director, J Luke Lentz, MD via e-mail — drlentz@aluwe.com.

Help us help the victims of Lyme to a new quality of life with this new breakthrough resulting in a totally new protocol.
